

DiskWarrior has successfully built a new optimized directory for the disk named "Macintosh HD." The new directory is ready to replace the original directory.

The original directory is damaged and it was necessary to scavenge the directory to find file and folder data.

Some files that had been lost or thrown away may have been recovered.

Comparison of the original and replacement directories indicates that there will be changes to the number, the contents and/or the attributes of the files and folders. It is recommended that you preview the replacement directory and examine the items listed below. All files and folders were compared and a total of 12,928,374 comparison tests were performed.

- All errors in the directory structure such as tree depth, header node, map nodes, node size, node counts, node links, indexes and more have been repaired.
- 1 missing folder had to be recreated.
- 1 folder had a duplicate name that was repaired.
- 5 folders had an incorrect item count that was repaired.
- 5 folders had a directory entry with an incorrect custom icon flag that was repaired.
- 2 files/folders had to be moved to the "Rescued Items" folder.
- Incorrect values in the Volume Information were repaired.
- 1 file could not be found.
- 5 folders could not be found.
- 4 folders will have more items.
- 1 folder will have fewer items.
- 1 folder had Permissions that changed.
- 1 folder had a Creation Date that changed.
- 1 folder had a Modification Date that changed.
- 13 files had a Name that changed.

#### Disk Information:

Files: 493,210

Folders: 112,864

Free Space: 6.27 GB

Format: Mac OS Extended (Journaled)

Block Size: 4 K

Disk Sectors: 155,189,248

Media: ST9100824AS

Time: 6/13/07 8:51:29 PM

DiskWarrior Version: 4.0
